

IIBEC WESTERN CANADA / RCABC 1- DAY COURSE – NOV. 8 OR 9, 2023

ROOFING CONTRACTORS
ASSOCIATION OF
BRITISH COLUMBIA

Western Canada Chapter

IIBEC

Metal Roofing - IIBEC Fall Practical Seminar

This full day program, option to attend November 8 or 9. The course will consist of a half day of in-class learning and a half day of hands-on practical learning. This course is intended for new roof observers and design professionals looking to gain practical knowledge on application techniques they may observe during site reviews and to get insight on the design concepts and components of metal roofing.

8:00 - 12:00 Theory: The first portion of the day will be an in-class learning event on the basics of metal roofing. You will learn about the different types of metal roof panels, seams and assemblies. You will also learn about the different considerations that are required during the design and the installation of metal roofing systems. Experienced Roof Observers will discuss observation techniques and case studies.

12:00 - 1:00 Lunch provided

1:00 - 5:00 Practical: The second portion of the day will be the "hands-on" portion of the training. An instructor will demonstrate how to secure metal roofing panels and some of the other associated components. You will be given the opportunity to try it yourself and show off your roofing skills!

*Al Martin, RRO, Evoke Buildings Engineering
Sean Campbell, TQ, RRO
Dan Geddes, Flynn Canada
James Klassen, RCABC*

Cost: \$175.00/member - \$225.00/non-member
