IIBEC WESTERN CANADA CHAPTER/RCABC
2 – DAY COURSE – NOVEMBER 12/13, 2026

Introductory Course to Single Ply Field Reviews - *What you may have been missing*

The 2-day program focuses on single ply roofing application including an EPDM seminar and TPO/PVC seminar happening simultaneously each day (Attendees will attend both - switching seminars on alternate days). This course is intended for newer roof observers looking to gain practical knowledge on application techniques they may observe during site reviews and to get insight on how to look for issues on a roof.

8:00-12:00 Theory: Various manufacturers will review past experiences from the field as well as application guidelines, history and manufacturing of single ply membranes. Experienced Roof Observers will discuss observation techniques and case studies to assist in what to look for when reviewing single ply roof systems. Attendees will review how to navigate single ply within the RCABC RPM.
12:00-12:30 Lunch provided

1:00-4:30 Practical: Review pre-installed mock-ups and take part in a deficiency investigation. Gain practical knowledge by installing materials, under supervision, on roof area mock-ups. Materials & tools provided, but P.P.E. REQUIRED (B.Y.O.)

4:30 Social THURSDAY: There will be a social gathering at Jimmy Mac's for those interested. as an opportunity to reflect, connect, and unwind over food and refreshments brought to you from your industry leading manufacturers.

Cost: $275.00/IIBEC National member - $375.00/non-member
